Shade cover for sandpit 4x2 m (adjustable) ZP421

Product type ZP-421

Basic information

Age category from 0 years Minimum area 7 m x 5 m

Equipment measurements 5,02 m x 3,02 m x 2,4 m

Free fall height:

Load capacity:

Max. number of users:

Fall zone: EN 1177

Designation:

Availability of spare parts:

Certificate of Compliance:

Not specified

Not specified

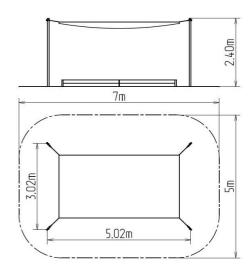

exterior

supplied by the

ČSN EN 1176

Material

Metal parts - structural steel Tarpaulin - raschel

Finish

Hot-dip galvanizing

Description

The supporting structure of the sandbox shading is made of structural steel, which is protected against corrosion by hot-dip galvanizing, which results in a very significant extension of the life of the gaming element. This construction is embedded in a concrete bed. The sandbox shade is made of so-called raschel (high-quality, strong and durable shielding fabric). The sandbox shading is water permeable. All fasteners are galvanized or stainless steel.
