supplied by the
ČSN EN 1176 - 1

Material

Metal units - structural steel Information board - aluminium

4.3m 4.3m

Finish

Hot-dip galvanizing

Description

The information board structure is made of structural steel which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements or duplex powder coated with coat curing according to RAL to prevent corrosion. This structure is embedded in a concrete base. The board is made of aluminium. All connecting material is zinc or stainless steel coated.
