

Grass pad (impact area for public playgrounds)

Product type DP-DG-001

Basic information

Age category	Not specified
Minimum area	m x m
Equipment measurements	1 m x 1 m x 0,02 m
Free fall height:	3 m
Load capacity:	Not specified
Max. number of users:	Not specified
Fall zone: EN 1177	for a fall height up to 3 m
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176, ČSN EN 1177

Material

Grass pads – recycled plastic

Finish

Description

Grass pads are made from recycled plastic and lock together. Installation is simple: pads are laid on the lawn and underlaid with a plastic mesh preventing them from being pressed into the ground. The edges of the pads are secured with pins and covered with turf. The recycled plastic protects against slipping and is UV resistant. Furthermore, it contains a flame retardant that protects it against being vandalised. The pads prevent the lawn from being trodden down; grass growing through the pads is maintained in the standard way with a mower.

Equipment

Delivery includes: grass reinforcement mesh, installation pins (2 pcs/1 m2)
