

## Climbing set SS901D

Product type SS-901D-20

### Basic information

Age category	3 - 15 years
Minimum area	6,5 m x 6,5 m
Equipment measurements	2,51 m x 2,5 m x 2,01 m
Free fall height:	2 m
Load capacity:	486 kg
Max. number of users:	9
Fall zone: EN 1177	Rubber or gravel, 42,5 m <sup>2</sup>
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176 - 1

### Material

Wooden parts - glued wooden supports  
 Metal units - structural steel  
 Ropes and nets - polypropylene with a steel internal core  
 Plastic parts - polyamide

### Finish

Impregnation and coating with a triple layer of lacquer  
 Komaxit powder coating  
 Hot-dip galvanizing

### Description

The climbing set support structure is made from thick glued wooden supports. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys). The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground. All other metal units are zinc coated and KOMAXIT powder coated according to the RAL. The climbing net, the horizontal climbing net, the climbing rope and the rope ladder are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and they are connected with plastic joints. The ropes are connected with plastic joints. All fastening material is galvanized or stainless steel.

### Equipment

Climbing net, 2x climbing pole, fitness rack, Swedish ladder, 2x climbing rope, rope ladder, horizontal climbing net.
