

Chain swing RH106KW-B - Brown

Product type RH-106KW-10-B

Basic information

| | |
|------------------------------|--------------------------|
| Age category | 2 - 10 years |
| Minimum area | 7 m x 4,88 m |
| Equipment measurements | 1,62 m x 1,92 m x 1,67 m |
| Free fall height: | 1 m |
| Load capacity: | 54 kg |
| Max. number of users: | 1 |
| Fall zone: EN 1177 | Grass surface |
| Designation: | exterior |
| Availability of spare parts: | supplied by the |
| Certificate of Compliance: | ČSN EN 1176 - 1, 2 |

Material

Metal units - structural steel
Seat - rubber with an aluminum insert
Plastic units - HDPE

Finish

Komaxit powder coating
Hot-dip galvanizing

Description

The support structure of the swing is made from structural steel (steel profile 60 x 60 mm), which is KOMAXIT powder coated according to the RAL colour chart and is fixed in a concrete bed.

Leaves of plastic are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The swing is hung on a metal girder using galvanized chains. The seat is made of rubber and is reinforced with an aluminum insert. The chains are stainless steel, resulting in a very prolonged service life of the product. All fastening material is stainless steel.

Equipment

1x BABY seat, 2x leaf of plastic
