

Chain group six swing RH610KW - Brown (f.h. 1,5 m)

Product type RH-610KW-15

Basic information

Age category	2 - 15 years
Minimum area	12,2 m x 11,6 m
Equipment measurements	5,1 m x 5,8 m x 2,29 m
Free fall height:	1.5 m
Load capacity:	324 kg
Max. number of users:	6
Fall zone: EN 1177	Rubber or gravel, 63 m ²
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176 - 1, 2

Material

Metal parts - structural steel
Normal seat - aluminum, covered with rubber
Baby seat - rubber with aluminum insert

Finish

Komaxit powder coating
Hot-dip galvanizing

Description

The support structure of the swing is made from structural steel, which is zinc coated and KOMAXIT powder coated according to the RAL colour chart. The structures are anchored into the ground in steel plates, which are protected against corrosion by hot-dip galvanizing and fixed in a concrete bed. The anchors are fastened to the play unit with bolts and their structure ensures that they are not in direct contact with the ground.

The seat is made of rubber and is reinforced with an aluminum insert. The Normal seat is made of aluminum, covered with a soft and comfortable rubber. The chains are stainless steel, resulting in a very prolonged service life of the product. All fastening material is galvanized or stainless steel.

Equipment

6x metal beam (galvanized), 4x Normal seat, 2x Baby seat. We offer three color variants of the support structure - red, blue and brown.
