

Game set castle UNH2068KW - brown

Product type UNH-2068KW-20

Basic information

| | |
|----------------------------|--|
| Age category | 3 - 15 years |
| Minimum area | 8,5 m x 7,5 m |
| Equipment measurements | 4,36 m x 3,85 m x 3,66 m |
| Free fall height: | 2,0 m |
| Max. number of users: | 15 |
| Fall zone: EN 1177 | Rubber or gravel, 59 m ² |
| Certificate of Compliance: | ČSN EN 1176-1 ed.2 +A1:2024 ČSN EN 1176-2 ed.2:2018 ČSN EN 1176-3 ed.2:2018 ČSN EN 1176-11:2015 |

Material

Plastic units - HDPE, polyamide
Metal units - structural steel
Slide and tube slide - fibreglass
Ropes and nets - polypropylene with a steel internal core
Platform - HPL

Finish

Duplex powder coated with coat curing
Hot-dip galvanizing

Description

The supporting structure is made of galvanized structural steel and then powder coated, and all other metal parts are made of black structural steel, sandblasted, duplex sprayed with powder coated.

All other metallic elements are also zinc coated or duplex powder coated with coat curing according to RAL to prevent corrosion.

The slide and tube slide are made from fibreglass. The surfaces of the slide, tube slide, steps, etc. are made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). The rope bridge is made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and is connected with plastic or aluminium joints. The platforms are made from HPL (High-pressure laminate, which is characterised by high colour stability and water resistance). All fastening material is galvanized or stainless steel.

Equipment

2x tower, tube slide, slide, Zinnenbattlements, 2x barrier, rope bridge, sloping ramp with steps and sides, vertical pole climb.
