

Interactive panel IP102D

Product type IP-102D-10

Basic information

| | |
|------------------------------|-------------------------|
| Age category | from 0 years |
| Minimum area | 4,3 m x 3,2 m |
| Equipment measurements | 1,3 m x 0,12 m x 1,41 m |
| Free fall height: | 0 m |
| Load capacity: | Not specified |
| Max. number of users: | Not specified |
| Fall zone: EN 1177 | Grass surface |
| Designation: | exterior |
| Availability of spare parts: | supplied by the |
| Certificate of Compliance: | ČSN EN 1176 |

Material

Wooden parts - thick glued wooden supports
 Metal parts - structural steel
 Plastic parts - HDPE

Finish

Impregnation and coating with a triple layer of lacquer
 Hot-dip galvanizing

Description

The panel support structure is made from thick glued wooden supports. This solution ensures maximum protection against cracking, which is common for products made from solid wood. The wooden supports are impregnated and coated with a triple layer of lacquer, which meets the terms and conditions of the EN71/3 Standard (safe for children's toys).

The wall is made from high quality HDPE plastic (high density coloured polyethylene, which is characterised by high colour stability, UV resistance but mainly safety as it doesn't break and therefore there is no danger of injury to children by sharp fragments). All fastening material is galvanized or stainless steel.
