Description

The support pillar of the rope pyramid is made from structural steel with a diameter of 159 mm. The pillar is protected against corrosion by hot-dip galvanizing and KOMAXIT powder coated according to the RAL colour chart and fixed in a concrete bed. The ropes are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and are connected with plastic or aluminium joints. The turnbuckles are stainless steel. All fastening material is galvanized or stainless steel.
