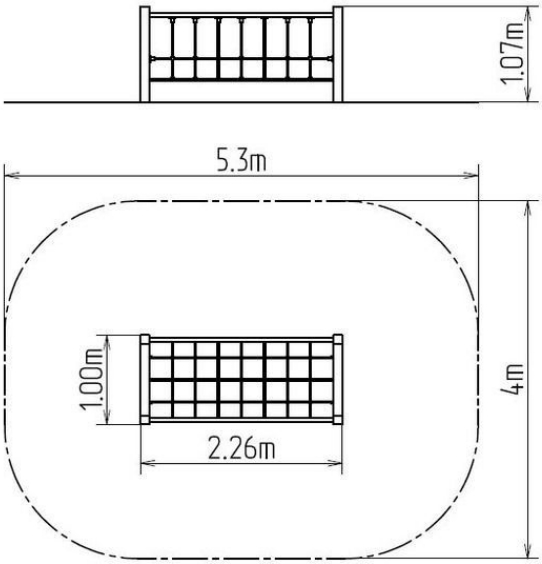
Rope bridge LL102KR-Q - red (f.h. 1 m) (Coastal region)

Product type LL-102KR-10-Q

Basic information

Age category	3 - 15 years
Minimum area	5,3 m x 4 m
Equipment measurements	2,26 m x 1 m x 1,07 m
Free fall height:	1 m
Load capacity:	162 kg
Max. number of users:	3
Fall zone: EN 1177	Grass surface
Designation:	exterior
Availability of spare parts:	supplied by the
Certificate of Compliance:	ČSN EN 1176 - 1



Material

Metal units - structural steel
Plastic units - polyamide
Ropes - polypropylene with a steel internal core

Finish

Komaxit powder coating
Hot-dip galvanizing

Description

The support structure of the rope bridge is made of structural steel (metal profile 100 × 100 mm) which is protected against corrosion by zinc coating, resulting in a very prolonged service life of the workout elements, and coating with baked paint KOMAXIT according to the RAL colour system. The structure is fixed in a concrete bed. All other metallic elements are also zinc coated and treated with baked paint KOMAXIT according to the RAL colour system.
The ropes are made using HERKULES material (16 mm thick ropes made from polypropylene with a steel internal core) and are connected with plastic joints. All fastening material is galvanized or stainless steel.

Equipment

We offer three color variants of the support structure - red, blue and brown.
